Email Alert & Status

Did you know any of your Sharp MFP's in the field can email you meter readings and Alerts for paper jams, out of toner, etc.?

Setup tips:

- SMTP must be configured and working
- SNMP must be enabled
- all alerts are emailed, no way to edit
- assure the MFP has the latest Firmware

Under the **Standard** tab / Email Status message is for meter readings. Under the **Advanced** tab / Status message setup is for alerts.
