Plan ahead to ensure your installation is a great success! Check the latest information on these products and have the following items available prior to installation.

- Verify power dedication and check for power stability. The MX-B402 Document System requires AC 100-127 VAC, 60 HZ, 12 Amps power source.
- Confirm that you have the latest firmware available to upgrade your MX-B402 Document System immediately.
- Some accessories require a product key for operation. You should obtain the accessory Application Code, machine's serial number and register online prior to arrival.
- Verify that the customer has enough supplies on-hand to complete a large rush job. After-hours printing and/or holiday work may take place following an installation.

MX-B42NT1 Black Toner Cartridge

MX-B42NV1 Black Developer

MX-C40NRB Black Drum Cartridge

■ Check to see if My Sharp™ online training is set up for the end-user.
